pools made easy

Install in the morning, swim in the afternoon.

ORDER, DELIVER AND SWIM!

Pools made easy.

- Fully manufactured and pre tiled off site to your specifications
- Water depth made to order
- Pool depth installation is totally flexible, from full depth to completely free standing
- No tradesman on site or disruption to landscape during manufacturing process
- Fully plumbed & Installed in one day

We would like to present to you a new and innovative design choice for you to consider when specifying or building a plunge pool or deep spa.

We believe we have created a fast and cost effective way to create a fully reinforced concrete Plunge Pool that is fully manufactured off site. You simply order to meet your specifications and approximately 2 weeks later your concrete plunge pool arrives on site ready to be craned into position. All that remains to be done is connect the pump / filter and fill with water. The pool is ready to fill, it really is a pool made easy!

Our aim is to make pool installation as easy as possible and we believe our product does just that.

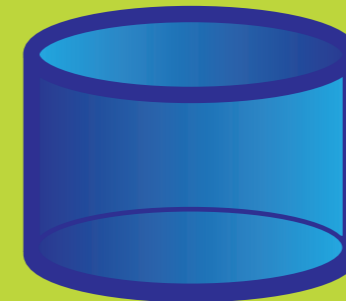

All it takes is 3 simple steps :

1. Order pool size and select tile and coping
2. Pool is delivered to site
3. Install and swim.

It's that easy!

Available in three widths.

Model# APP 2.4
Width 2.4m / Varying Depth - Max water depth = 1.35m

Model# APP 2.7
Width 2.7m / Varying Depth - Max water depth = 2.1m
